Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are:

There is no structural relationship between "the sensor/processing circuit" and "the devices" of claim 1. To remedy this, in claim 1 line 8, "process value" should be changed to "the process value" and "one or more sensors" should be changed to "the one or more sensors".

Claims 2-12 depend from claim 1 and incorporate the same deficiency.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2125

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7, 11, and 13-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 00/54237 to Graviton, Inc. ("Graviton"), supplied by the applicant. For example, Graviton discloses an apparatus for use in a building system, and a corresponding method for using the apparatus comprising: obtaining from a microelectromechanical (MEMs) sensor device at least one value representative of a measurable quantity in a building; generating a control output based on the at least one value and set point information, the control output configured to cause an actuator to effect change to the measurable quantity; wherein the set point information includes a desired temperature for at least a portion of the building; further comprising providing the control output to an actuator in a building comfort system; further comprising communicating information representative of the at least one value to a controller using wireless communications, the controller operable to generate the control output (e.g., pg. 4 line 1 – pg. 6 line 29, pg. 10 lines 21-28, pg. 13 lines 27-32, pg. 15 lines 1-32, pg. 17 lines 1-9, pg. 18 lines 11-15).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which

Art Unit: 2125

said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Graviton as applied to claims 1 and 6 above. Graviton does not explicitly disclose that the battery is a lithium ion battery coupled to a power management circuit, or that the ROM is an EEPROM. However, such devices are well known in the art and have well known advantages. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention to modify Graviton to include the above features due to their well-established advantages.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan A. Jarrett whose telephone number is (703) 308-4739. The examiner can normally be reached on 10:00-6:30 M-F.
